

Representation-regime map from existing compilation results

○ Cubic spin glass □ Max-3SAT

All-to-all: Two-qubit gates

All-to-all: Two-qubit depth

All-to-all: Routing overhead

12-qubit 3 x 4 grid: Two-qubit gates

12-qubit 3 x 4 grid: Two-qubit depth

12-qubit 3 x 4 grid: Routing overhead

Each point is one estimable raw instance-endpoint comparison. The sparse row has only nine common-feasible instances, so this map is descriptive and is not yet a universal selection rule.
